SPECTRUM MOBILITY SOLUTIONS

Spectrum Resources helps companies to optimize their mobile workforce by providing expertise in the field of Mobility and Wireless Data Exchange. Our Mobility Team consists of Senior Level Executives and Leading Vendors working together to offer complete "End to End" Workforce Automation Solutions. Spectrum's Mobility Experts assess how accurately a company's Mobility environment meets their existing and projected future needs. We use our copyrighted Methodology to create an effective marriage of business, technology, and connectivity to "Bridge the Mobility Gap".

Spectrum's primary focus is Work Force Automation of Sales, Service, and Delivery.

We provide Mobility Solutions using Field Execution Applications, GPS, Fleet Management and Virtual Inventory. Location based services, also referred to a "Wireless Workforce", enable service organizations to pinpoint the locations of their field assets to enhance asset security, improve dispatch accuracy, drive workflow compliance, and improve responsiveness to customer service requests.

Spectrum's Solution Architecture is component based, which allows for flexibility in selecting the specific components that a company needs. Our project plans include an exit strategy to help companies become self sufficient within their own organization.

Spectrum's Mobility Solutions Increase Productivity, Efficiency, and Revenues:

- ⊙ Service Revenue Improvements
- ⊙ Lower Overtime Pay
- ⊙ Lower Mean Time to Repair
- ⊙ Lower Fuel Costs
- ⊙ Higher First Call Resolution Rates
- ⊙ Higher Customer Retention

Enterprise Wide Mobility Solutions
